

Job Announcement: PE, Civil Engineering

ICON Engineering, Inc. is seeking a full-time professional engineer with interest in civil planning, design, and management with a focus on stormwater analysis and design. A BSCE in Civil Engineering, Professional Engineering license, and 4-8 years' experience in stormwater and water resources is required. A desire to work in a collaborative, flexible small team environment will be important. Advanced understanding of CAD, GIS, hydrologic and hydraulic modeling, and other related software tools is important. Salary commensurate with experience. ICON offers a Denver Tech Center office, modified work week, health insurance, PTO, 401k, and paid overtime.

The ideal candidate for this position will have experience working in watersheds along the northern Front Range of Colorado, ability to work independently on a variety of projects, and flexibility to work remotely from Ft. Collins or other nearby locations. Established relationships and ability to generate new connections with local communities will be important.

ICON Engineering, Inc. was founded in January 1997 as a locally owned and operated consulting engineering firm. Our areas of service include nearly all aspects of civil engineering across a broad range of clients in and around Denver, the Front Range, and Rocky Mountain West. We have widely respected capabilities in public and private sector infrastructure planning, design, and construction management. ICON is a Colorado based corporation owned by senior management personnel who are "hands-on" engineers involved in all technical phases of our projects and the professional development of the ICON staff.

Interested candidates can send resume and cover letter to Mr. Troy Carmann, tcarmann@iconeng.com
