

Muller Engineering Company, Inc. is an employee-owned civil engineering consulting firm located in Lakewood, Colorado specializing in the planning and design of transportation facilities, water resources projects, stormwater and flood control management, and water and wastewater utilities. Since 1980, Muller has served a long-standing list of loyal clients, primarily in the public sector. We are a mid-sized firm of more than 80 employees, offering an enjoyable and personable work environment with opportunities for employees to be rewarded for high performance.

Muller offers excellent benefits that include PTO, holidays, medical/dental/vision/disability/life insurance, tuition reimbursement, Safe Harbor 401(k) plan, and discretionary profit-sharing and bonus programs. Muller is an affirmative action employer and age 40 and over, color, disability, gender identity, genetic information, military or veteran status, national origin, race, religion, sex, sexual orientation or any other applicable status protected by state or local law are not taken into account in any employment decision.

The following position is currently available:

## **Stormwater/Stream Restoration Project Engineer**

Muller Engineering is seeking qualified candidates for its water resources staff at the project engineer and project manager level. The work will be focused on stormwater capital improvement projects with the main clientele served being state and local agencies.

### **Essential Duties and Responsibilities:**

- ✓ Design of stormwater improvements such as stream restoration/stabilization measures, detention facilities, water quality features, culverts and storm drains, and to provide associated hydrologic and hydraulic modeling, floodplain studies, geomorphic evaluations, scour analyses, erosion and sediment control planning, and assistance with environmental permitting.
- ✓ Provide hydrologic and hydraulic engineering support to Muller's transportation projects throughout the Rocky Mountain Region, which include roadways, regional trails, and bridges
- ✓ Preparation of construction drawings using AutoCAD Civil 3D and Inroads, development of specifications, technical report writing, construction engineering support, and guide the work of design engineers and technicians.
- ✓ Assist Project Managers with project management duties. Project Manager will provide oversight and guidance of Project Engineers management responsibilities.

### **Education and/or Experience Requirements:**

- ✓ Bachelor's degree in civil engineering (or a closely related field) from an accredited college or university; advanced degree a plus
- ✓ 8-12 years of experience with focus on design of stormwater improvements
- ✓ Experience with hydrologic and hydraulic computer programs and utilization of UDFCD criteria
- ✓ Excellent written and oral communication skills
- ✓ Self-motivated, detail-oriented professional with strong organizational skills

### **Licenses/Registrations:**

- ✓ Professional Engineer (PE) in Colorado or ability to transfer from another state
