VIRTUAL RAS Mapper for 1D Modeling

February 28th, 2024
8am-12pm

Course Description

This course is designed to introduce the user to the GIS capabilities RAS Mapper brings to 1-Dimensional RAS modeling. Students will become familiar with the module's interface, learn how to build a terrain model as well as how to create and edit 1D model geometry, and explore ways to interact with model results within RAS Mapper to evaluate and improve their work.

Attendees should have HEC-RAS installed on their laptop, version 6.3.1 is recommended

Learning Outcomes:

1. Obtain a working understanding of the module's interface.
2. Build a terrain model.
3. Calibrate and edit 1D model geometry.
5. Understand how to use RAS Mapper to interact with model results to evaluate and improve their work.

Cost:	**Date:**	**Register:**
$125	February 28th, 2024	Registration opening
*plus $4.04 credit card fee	8am-12pm	January 16, 2024

Location:
